#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 11 and 14 recite the limitation "the sleeve" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim. It appears that the term should be replaced with the term "the drum" which given antecedent basis in claim 1.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12, 14-23 and 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurita et al. (U.S. Patent No. 5,695,031).

Kurita et al. shows a conveyor idler including a drum 1 with outer and an inner surfaces, a shaft 23 about which the drum can rotate in a forward direction, and a locking mechanism 3 that prevents the drum from rotating in a reverse direction while permitting rotation of the drum in the forward direction. The locking mechanism has a plurality of ramped wedging surfaces 6 formed on an outer ring 4 of the locking mechanism. The outer ring is fixed to the drum 1

Art Unit: 3651

As can be seen in Fig. 1, the part of the outer ring 4 positioned against the inner surface of the drum 1 forms a reinforcing web extending between the end members. Thus Kurita et al. shows all the structure required by claims 1-12, 14-23 and 25-27.

***Allowable Subject Matter***

6. Claims 13, 24, and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited prior art not discussed above shows various locking means for drum rollers similar to that of the present invention.
